Bow Island, Alberta.

We are glad to report that Mr. R.A.
MacDonald (Scotty) has been able to
get out a little, after four weeks
medical attention in Lethbridge Hos-
pital, where he was recently operated
upon for acute Appendicitis, it was
a most dangerous operation on account
that the appendix had burst eight
hours before the operation, in most
cases that is fatal and Scotty may
thank God and the Doctor's skill that
he is still alive. Drs. Campbell and
Bryan operated on him.
He went last Tuesday to visit his
brother at Coaldale and from there
he will attend Lethbridge Hospital to
to have his wounds dressed

Mr. and Mrs. Gilbert entertained at
a farewell dinner, Mr. and Mrs. J.M.
Milroy and the Rev. and Mrs. Percy
Johnson of Burdett, Mr. and Mrs. B.
D. Smith and Mr. and Mrs. F.W.
Taylor, this dinner was held just be-
fore the evening train left, to be fare-
well to Mr. and Mrs. Milroy who are
leaving for Indian Head, Sask.

The W.M.S. held a tea in the Rest
Room last Saturday afternoon the
18th, but owing to the cold weather
there were not many there

The Ladies Auxiliary met in the
Club Room last Saturday afternoon

Mr. and Mrs. Brant Smith and little
son Leslie left for West Virginia last
Monday evening Nov. 15th

Watch out for Swennumson's
"Discount Sale"

Mr. MacLauchlan and Mrs. Chas.
Scott were visitors to Bow Island on
Wednesday last and spent a very
nice evening at Mr. and Mrs. J.
Boutner's

Frances Halloran has returned from
the convent and has started school in
Bow Island again

United Church

Sunday Nov. 21st. Mr. Gilbert's
subject for the evening service is the
"Latter Day"

Next Sunday Nov. 28th. Miss Gordon
of the Canadian Bible Society will
speak

You will be made welcome at all the
services
Sunday School at 11. Song Service 7:15
Church at 7:30

St. Michael's Church

Mass will be celebrated on Sunday
21st. at 11:30 a.m.

ATTENTION

The next time you require any Bacon, Bologna,
Baked Loaf, Cooked Ham, Picnic Hams or
Pork Sausage, give us a trial and be convinced
that we only handle the Best at the most
Reasonable Prices.

NOTE:- We have an up-to-date Meat Slicer and are able
to Slice your bacon just as you would like it, which is
impossible with an ordinary knife.

Review is printed every Thursday

Court News

We were all glad to hear that last Wednesday Steve Halpin was on his case against Grant Smith & Co. and then the car fell into a trench at night, that had been dug by the defendants right in the public road about one mile East of Burnwell in September 1919 (further particulars will appear next week.)

Police Court News

From our own Correspondent

Sergeant Lobb and Detective Ferguson while here in town last week did search Dr. Munro's premises and found a worm for the purpose of making liquor, he was summoned to appear at Lethbridge on the 10th. Nov. failing to appear he was arrested on Tuesday night last on a warrant and was returned to Lethbridge on the midnight train by Constable Fleming, he returned to Bow Island on Wednesday night's train.

Edward Sather appeared last week before J. J. Brown, J.P., at the A.P.T. court charged with the theft of a cream separator and dresser under the value of \$10, the property of F. J. Henderson, complainant. He pleaded guilty and was fined \$10 and costs or in default 30 days in jail. Fine and costs paid.

The above was a case where Sather had rented Mr. Henderson's farm, four miles west of town, a couple of years ago. There was some furniture and a small cream separator left in the house with the understanding that Sather could buy the same later on if he wished, which he had done last fall. Before leaving the farm last week when setting up he sold the articles back to Mr. Henderson, the same to be left in the house. Instead of leaving the goods in the house, Sather resold the separator to a neighbor for \$12 and put the dresser with his household goods in a car of effects which he was shipping to Blackfalds, hence the above action.

Wilfred W. Hill, of Purple Springs, appeared last week at Grassy Lake before H. P. Burrell, police magistrate charged that he did sell grain while a note for the price of seed grain given by him to the Municipal District of Eureka, No. 65, remained unpaid with intent to prevent the enforcement of the lien created by such note and did sell the grain covered by such lien to the Alberta Pacific Grain Company, Limited, such grain not being sold by the said Wilfred W. Hill as being the property of and for the accounts of the Municipal District of Eureka No. 65, contrary to the provisions of section 10 of the Municipal District Seed Grain Act. The accused pleaded guilty. His worship stated that this was the first offense under this act in the district, he would only fine the accused \$10 and costs or in default of payment of ten days imprisonment. Fine and costs paid.

DROP in TEA PRICES

Downward Trend Affects Both Jobbers and Retailers in Canada.

Though cheaper grades of tea have been dropped now in price from 75c to 60c for the past three weeks, the higher grades are still holding up pretty well to their original price of 85c to 95c. A message from Toronto contained the information that a popular variety of tea would be cut from 75c a pound retail to 65c, though no notice of any fresh drop has been received.

The downward trend in tea prices have meant a general loss throughout the trade, both jobbers and retail. These losses average round about \$500 as all had stocks on hand when the first drop was made. Some retailers lost more than others, as all did not drop immediately.

Though higher priced tea have been holding up steadily, the drop of the lower grades are sure to exert an influence on the others.

Additional Bow Island

Dr. Hargrave's assistant from Medicine Hat was a business visitor here last week inspecting stock to be shipped to the States.

Mr. Hurd left Thursday last for Selma, California. Mr. Hurd is going to reside there, and will not return until next fall for the purpose of looking after his own interest in the crops. Mrs. Hurd will join her husband later.

Mr. Minnie was in town last Saturday and we are sure some of his friends will be very glad to receive him once more.

Mrs. Maurice Bernon has returned home after a six weeks' trip to the east. She went as a delegate to attend the convention of the Canadian Women's Press Association, held at Montreal. Mrs. Bernon also visited Quebec city, Ste. Anne de Beaupre, Hamilton, Toronto, Fort William, and Ottawa.

Constable Bradner was a business visitor in the Maleb district, making investigations re theft of the Hawkfowl on Saturday last, but there was no clue.

NOTICE

U.F.A. and U.F.W.A.
Pres. J.D. James Pres. Mrs. James
Will meet on Saturday
November 20th
General Business
Sec. G. Mond See Mrs. McGregor

Mr. Blaine, druggist, is leaving here very soon for Nanton, where he intends to reside.

Mr. H. Beattie arrived home on Saturday last from the Crow's Nest Pass where he has been foreman of public work, and is through for the present, owing to the roads freezing up.

Mr. Carlson (Patty) is quite a genius these days fixing up auto pumps.

Mr. Hans Garvin and Peter Bevan of Nemiskam, were business visitors here last Saturday.

Good Cheer Topics

Elfr Davidson was a business visitor to Bow Island on Tuesday.

Andy Albertson left for Hugh's N.D. last Monday where he will visit his brother, before returning to his home in Wis.

Mr. Carl Pederson returned home from work at Coalville.

Mr. Grant Lindquist and Mr. Evan Evans Sunday at the Perry Ranch, North of Burdett.

WINDY RIDGE DISTRICT

Mrs. Badley of this district is leaving next Wednesday evening for California owing to ill health.

MALEB

We wonder who were the party or parties that did so liberally help themselves or did steal between 60 and 70 White Leghorn pure-bred fowls from Mrs. Hawkfowl, 18 miles south-east of Bow Island. It is not too bad that they were not conscientious at the time of committing the act, stopping for one moment and asking themselves why they were depriving a poor widowed lady of her one way of supporting herself? It is too bad that their sins do not find them out.

Mr. and Mrs. W. Coltharp were business visitors to Bow Island last Saturday.

Mr. Tweedie was a business visitor to Medicine Hat last Friday.

Mr. Geimer Hawkfowl left last Wednesday, November 10th, for Lethbridge.

SHRINERS GO TO CALGARY, DEC. 6TH

Shriners from here and surrounding districts are expected to go to Calgary in good numbers on Monday, December 6. The occasion is the thirtieth annual ceremonial and also the seventy-first birthday of the postulate. In the literature being circulated it is described as the "Red Letter Day" of Al Ashar Temple.

BREAD DROPS CENT A LOAF AT WINNIPEG

WINNIPEG.—Bread manufacturers of Winnipeg, following a recent reduction of 40 cents a barrel on flour have announced a reduction of one cent a loaf to take effect Monday. This will bring the price of bread down to eight cents for 16 ounces and 10 cents for 20 ounces.

Foster's Weather Forecast

On November 13 cold weather is expected in the great central valleys of the Mississippi and Red River of the north, a warm wave on the Pacific slope and in the northern Rockies, cold in the cotton states. This condition will pass eastward during the next three or four days and a high temperature wave will come in from the far northwest occupying the great valley not far from November 19. That will be a great rise in temperature, affecting the whole continent and bringing good weather for growing crops and outcrop affairs.

But look out for squalls. The frontier people of the great central valleys, a hardy set, not much informed on the climate and storms of that new country that the college bred now know, would prepare for a norther when such lies, pleasant, clear, rapidly warming days come in. I must warn you of the last third of November, it will be rough and tough, squally and cold, particularly in the middle northwest. The whole continent will be afflicted by that great storm period and those late November days will make good for this month's record of bad storms and disagreeable weather. The most powerful electro-magnetic suns of Uranus, Jupiter and Mars will be trained on this little speck of dirt, which only a few hundred years ago was considered the centre and principal object of the great universe.

An old aphorism says: "It is a poor wind that blows nobody any good." These great storm periods invigorate animal and vegetable life, put new life into the soil and indicate good growth and vigor for the growing crops. Winter grain and the hay grasses that live through the winter will be better because of these great November storms.

A very important weather event will occur near middle of November. Official science is absolutely ignorant of the important fact that the amount of precipitation—rain or snow—depends on astronomical events that occur from 150 to 180 days apart. One of these changes occurs not far from November 15 and it promises good to a large part of this continent and bad to a smaller part. You will never get this information from official science; it does not know. Foster's Weather Bureau does know and the readers of this bulletin may know. That weather change will be bad for agriculture in Argentina and the capriciousness of that people will be good for agriculture of America and Canada.

Agriculture is the hub around which all other interests in America and Canada must revolve. Some acts of capitalism recently are calculated to depress, dishearten and drive farmers from the farm. I see victory for the farmers or for agriculture; it must not be otherwise. Please do not misunderstand or misrepresent. We all desire wealth, but we detect capitalism. This is a new word; or it is an old word with a new meaning, and it is now used all over the world to mean the misuse of wealth; robbery under the forms of law; wealth gained by damaging others; profiteering; "exploiting" industry. I stand for the protection of wealth, property, but against capitalism. That is the great political battle of the next four years. My interests lie with agriculture and its friends; with property and wealth fairly gained. I believe agricultural products must and will be protected. But it will be no easy contest. Capitalism is thoroughly organized, and I hope that all interests that deal with agricultural products will organize thoroughly. There is no other method by which justice can be secured.

The minister in conclusion urged his hearers to continue in the good work, to hold the ground already taken and to go forward and gain new ground.

Grassy Lake

Mr. R. Mills, eight miles south, had his dwelling burnt to the ground last week. The cause of the fire was from overloading of the stoves. Fortunately no lives were lost, all the children were sheltered in the barn.

Mr. Burrell, police magistrate, was an official visitor here last week.

A very interesting meeting was held here last week by a member of the Missionary Society from Waukegan, Wee, China, he also paid a visit to the Public School and addressed the pupils which was greatly appreciated, after which he was the guest of Mrs. Chas. Scott. He was accompanied by Mr. and Mrs. Lawrence.

Mrs. Chas. Scott is very busy these days getting her house renovated, which will be a great improvement to the town.

Mr. J. Llewellyn, butcher, moved to his new quarters last week.

Mrs. Watson spent last week-end at Lethbridge.

Rev. C. A. Sykes Says Prohibition Vote Is Sufficient

Calgary Clergymen States That Plebiscite Furnished Mandate to Government

That the majority in the recent plebiscite is a substantial one and a mandate to the government to enforce the present legislation and amend the act to further restrict the liquor traffic is the contention of Rev. C. A. Sykes. In discussing the situation in a sermon at Central Methodist church, Calgary, Mr. Sykes pointed out that many governments, provincial and municipal, are carrying on under less substantial majorities, and nobody even questions their right to do so.

He also pointed out that the provincial government of Alberta was elected by only about 19,000 and the government considers that it was elected by an overwhelming majority. Mr. Sykes deprecated the fact that there were a number of persons and institutions attempting to minimize the result of the plebiscite and interpret it as a small majority, holding that the premier should take it as a mandate to further restrict the traffic.

Mr. Sykes told the congregation that evangelizing work in the prohibition movement should be the watchword of the church people. There is a new generation to deal with, and it is the work of the church to educate the young people in the ways of sobriety and decency, as there has been too much resting on the oars since the abolition of the bars. He held that the present liquor act was being fairly well enforced, but that it would never be as well enforced as it should be so long as there were men in high offices opposed to the prohibition movement.

The minister in conclusion urged his hearers to continue in the good work, to hold the ground already taken and to go forward and gain new ground.

GIVES SHARP REPLY TO DEMAND TO LOWER THE BRITISH ENSIGN

NEW YORK.—Irish sympathizers in their fight on British flags displayed with those of other allies in celebration of Armistice Day, met with another rebuff, it was learned recently.

The Navy Club at 15 East Fifty-first street, which looks after the United States sailors and marines, though not officially under the government, was asked to haul down the British flag hung in honor of the anniversary. The demand was made on Captain G. P. Jackson, in charge of naval publicity and morale, at 24 East Forty-second street.

"Till thou dost go to hell," was Jackson's answer. "Keep the Union Jack there Armistice Day as you do the Stars and Stripes." The flag stayed.

Address all communications to Foster's Weather Bureau, 1629 N. Capitol street, Washington, D.C.

Growth of Creameries And Butter Exports In Western Provinces

As late as 1914, Manitoba was a large importer of creamery butter. The province's imports of creamery butter for the year named being 20 carloads. In 1912 it had been as high as 35 carloads imported. Then in 1913 the province began to export butter and the amount sent out increased rapidly from year to year. Last year Manitoba exported 152 carloads.

This change of position from the importing to the exporting column has been a large factor in gradually altering some very fundamental things in connection with butter manufacture, and the result is that, without the public taste of the country having decided why, the Manitoba factories have changed the nature of their output almost completely during the past few years.

A few years ago the creamery butter was much nearer in character to dairy butter than it is now. In the Montreal Family Herald. Then a great deal of quite sour cream was gathered and churned, the idea being "to put money into the factory" and more butter could be made from 100 pounds of cream if it was quite sour than if it was comparatively sweet. The cream was churned without pasteurization, and the butter was literally salted. This gave a high flavored butter—a butter with decided flavor in its unadorned state, and then with the particular tang which the salt itself contributed.

Joys of Rural Life

Community Work Means the Development of a Moral Purpose in Life.

There is much of adventure in hunting hills, and woods and prairie for hidden treasures in the way of rare flowers, insects, animals, birds, and studying their habits, the finest kinds of competitions can be held in this way; a community museum can even be started, and a thorough knowledge of our own district would lead on to the desire to extend our knowledge to other fields.

From an interest in nature and its works around us, will be developed a community interest in the welfare of our country. The different races in our country, their romances, and history will excite a desire to know and understand them—foster unity and peace by the explorer's spirit. All these interests would lead to an increase in the feeling of community responsibility and a real citizenship.

Interest in community work means the development of a moral purpose in life; it means an awakened intelligence, it means the birth of the co-operative spirit which is the only means by which civilization can progress upwards. It means Christianity in its truest sense. It is the young people needs organization, needs leadership. The young people are ready for it, it's up to the people to provide it.

The boys and girls are responsive enough, given the right lead, but this must come principally in the road districts from the parents in the houses and the schools. The schools are rapidly waking up, but their work will be infinitely delayed if the parents maintain the attitude of indifference to often met with to-day—Mrs. W. H. Parly, President, U. F. W., of Alberta.

Green Is a Natural Color.
Green is a natural color. Occultists say that of all colors green is the most friendly to the optic nerve. In lands where the sun is so strong, the eternal white causes flash up their glaring reflections, men move to shade their eyes or go blind. In the tropics, green never burns the eye. One can stare a forest in the face all day with impunity. Nature's green never gets on our nerves.

The Silver King.
To buy a silver mine at a sheriff's sale for \$300, the property being sold for pay wages due to the miner and then to sell the mine a few years afterwards for \$75,000 has been the good fortune of the Bitter Springs, Alberta, British Columbia, who just disposed of the Esperanza mine to a group of Vancouver men.

World's Smallest Coin.
The coin of the least value ever issued is the "mite," so-called, such as the widow of the Bible contributed to the poor. Its shape was hexagonal, and its value about one-fifth of a cent. It would take five thousand mites to make one dollar.

Hogs and Bacon Will Be Scarce

Certain Tied Hog and Bacon Prices Will Remain High.

So far farmers have been quick to grasp the lesson 1914 has taught them, and the result is that the demand for hogs in the number of breeding rows. A canvass of hog breeders in Ontario in the last two weeks shows that the trade in young stock to replace the supply in other parts for many years has been more active than this fall. One well-known breeder in Ontario states he is almost sold out. With twenty-five years' knowledge of the Canadian bacon trade, he attributes this to the fact that farmers have come to understand that there is "bare money" for the man who can breed for litter size and speed.

Yet the outlook has to go further. In some sections of the province the drop was as much as 75 per cent, compared with two years ago. In the Eastern Provinces also marked reductions have been recorded. Not until very farmer would breed a litter of more than four pigs and to breed at once his formal number of sows will undoubtedly begin to be studied.

The importance of a quick recovery cannot be over-emphasized. The great harvest of feed grains now available will largely be disposed of at a loss if not fed to livestock. Pigs for hogs today compare more favorably with the price of grain than for some time past. In the Eastern Provinces the marketings, Canadian overseas markets demand steady support if they are not to be lost.

In so far as the market is the supply so cut down. It is already convinced that hog prices and consequently bacon prices will remain comparatively high at least for some time. It is to restore supply must be done quickly. The breeding season for pigs begins in the first week in November, and cannot only until about the middle of December. If the opportunity is allowed to slip the recovery in numbers will be so retarded that our present shortage will be still more deepened, leading to loss.

Mexico's Oil Resources

In One Year Would Produce Double Its Present Output.

If Mexico's production was permitted to "flow" for their full capacity they would produce 881 million barrels of oil in the past twelve months, or double the entire production of the world, according to Engineer L. Stamps, who is a member of the party of Mexican Government officials.

By means of a station, wooden framework was covered by transparent canvas. That from below the effects was that of huge vaulted domes on the ground, the day of the storm. When the Gullies were signalled the lights were lowered sufficiently to make it seem an attempt was made to hide the station. The darkness was maintained for more than two miles beyond the notorious station were fictitious trains composed of a series of round points, the day of the storm. When the Gullies were signalled the lights were lowered sufficiently to make it seem an attempt was made to hide the station. The darkness was maintained for more than two miles beyond the notorious station were fictitious trains composed of a series of round points, the day of the storm.

Urges Modesty in Dress

Stiles Are Becoming Indecent.

Claims Mrs. C. H. Campbell.
Mrs. Colin H. Campbell, provincial president for Manitoba of the I.O. O. F., has issued a call to the members of the order to dress modestly and simply. "Fashions are becoming more and more indecent with each succeeding season," is her opinion as voiced at the autumn meeting of the provincial chapter. Mrs. Campbell also strongly urged the enforcement of Canadian regulations "to replace the inhuman police which is coming into Canada through the American magazine and the press."

Friendly Intercourse Again

German Professors Are Willing to Extend the Olive Branch.

German university professors and members of the Reichstag have agreed to reply to the appeal for re-establishment of the "friendly intercourse" which existed before the war, which the German government and the University recently addressed to professors of arts and science and members of universities and learned societies in Germany and Austria.

"Science knows only one aim—the search after truth—and it requires for the performance of this task the cooperation of all, regardless of national boundaries," says the German reply. "The war interrupted this joint search and disturbed many personal ties. We are ready to renew these connections and by common labor to relieve to broken every offering of knowledge or written, in both camps."

A post tells us that babies are now worn on life's ocean. Wrong! They are fresh squalls.

Prominent Railway Official

MR. S. J. HUNGERFORD.

Receives New Appointment

New Vice-President in Charge of Operation and Maintenance of C. N. Railway.

Samuel J. Hungerford, who has been appointed Vice-President in charge of Operation and Maintenance of Canadian National Railway, is of the type of man, born in years and old in experience. Born near Bedford in Quebec, in 1872, he was educated at the University of Toronto and in the business of the "rolling stock" for 34 years.

As a boy of 14, at Hamilton, Quebec, he first really became acquainted with a railway locomotive. Meritoriously speaking, he boarded it then and has made it carry him from the late of the machine's apprentice to the chair of the Vice-President of what will be, when the Grand Trunk system is included, the world's greatest railway.

Mr. Hungerford is a man of quick wit and a keen sense of duty. He has a wide circle of friends in the railway world—friends that he made while mastering the various jobs in the Mechanical Department and the important railway points clear across the country. Any of these friends, officer or engineer, Eastern or Western, will say that "S. J." is there with the gods, and that he knows a locomotive and a car from the rails up, and new to utilize them to the best advantage. "To his reputation of being past master in the art of handling men, of one who can be beaten on exact negotiations, and of one who is an all-round diplomat but first as the prevalent skill when necessary."

The job of Operating Vice-President is one of the most important in the railway service, and in the Canadian National Railway, S. J. Hungerford's new job may be classed in this proportion.

He will have the direction of forces that spend more than 90 per cent. of the total operating expenses of the system, and the present million-dollar (including the G.T.P.) and the present scale of expenditure, amount to 167 million dollars per annum. To Mr. Hungerford's business sense to see that the great expenditure of money day by day on the publicly-controlled road are so made as to insure the largest return in the condition of track structures and equipment and the movement of the largest amount of traffic possible. This, he has to do, the largest return in the condition of track structures and equipment and the movement of the largest amount of traffic possible. This, he has to do, the largest return in the condition of track structures and equipment and the movement of the largest amount of traffic possible.

Industrial Centre of Western Canada.
Facts and figures which will be used in the tariff inquiry to establish the strength of Canadian industry, have just been made public by the Bureau of Statistics, and show that at the end of 1914, when the information was gathered, the city of Winnipeg, Manitoba, has 779 industries with a capitalization of \$4,709,029, employees to the number of 19,121, a payroll of \$18,733,622, and an output of \$118,154,995.

Help in Manitoba.

The first venture into the hemp industry, launched last spring by the Government of Manitoba, is proving, will result in a successful first year, according to reports. There were 326 acres of hemp sown by the different farmers of the Winnipeg district and the probable yield is around 30,000 pounds. The company will realize \$30,000. Seed cost the company about \$8,500 and machinery a little over \$2,000. So far, the moderate success of the first year's operations will show a small profit.

A man's ears are placed so that he may catch all things said to his face. It was never intended that he should hear the things that were said behind his back.

W. N. U. 1342

Produce New Wheat Which Will Do Well In Northern Districts

As a result of experiments which have been carried on by the field husbandry departments of the Manitoba Agricultural College, a new wheat has been produced which, it is expected, will find a place in the north.

This statement was made by Prof. T. J. Harrison at a conference of officials held in Winnipeg recently. Prof. Harrison said he did not know how the new wheat compared with fully wheat, but he believed it was a wheat that would be of some value in the northern districts.

Another interesting announcement by Prof. Harrison, was that 1,500 bushels of wheat seed of different varieties has been produced on the college experimental field, and 350 bushels on the demonstration farm at Hirdle. The seed had cost the province considerable money, and he did not want to scatter it broadcast about the country and so lose control of it. He was the intention to distribute the seed in a way that would mean that when it was propagated it would go to seed in the hands of the farmers, and not into the hands of the speculators.

W. C. McKillop, of the Dominion Experimental Farm, Brandon, spoke of the progress of the seedling, and declared that satisfactory progress was being made with the testing of grain varieties and soil investigation. Speaking of certain work he said there were eight rotations under test. These covered the straight grain growing system without the use of manure, and the same system with manure applied. Other experimental work is being carried out with combinations of grain crops.

Valuable Clays in B.C.

Hinton, A Soluble Clay of Great Commercial Value Is Found at Merritt.

A valuable discovery has recently been made at Merritt, British Columbia, as a result of an inquiry from the British Imperial authorities asking for information as to possible deposits in Canada of bentonite, a valuable light weight, soluble clay, in appearance resembling the soapstone for which great industrial possibilities are developing. It is all the more valuable for the reason that there are very few known deposits in the world, the principal, so far as commercial extent is concerned, being in Wyoming, U.S.A., where it occurs in connection with coal deposits similar to those of Nicola Valley.

It has been found over small deposits of this clay in Alberta, the investigation of clay came across a large deposit of the finest bentonite, fine flint, and a large quantity of bentonite as the samples taken appear to be, is a soluble clay, composed of the finest imaginable atoms and absolutely free from grit. The clay, which is as hard as a rock, so that it has to be quarried, when dry, almost invariably crumbles when placed in water, into a perfectly smooth, creamy substance. It is used in the arts as a filler for finishing papers and for certain textiles, and a greatly increased demand would appear to have recently developed, partly owing to the scarcity of the article.

Weight of Metals

Something About the Lightest and Heaviest Metals Known.
Anybody who has handled a gold brick must have been astonished to find how heavy it was. Gold is, in fact, twice as heavy as lead. Yet it is not the heaviest of metals. There are four metals which are one-sixth heavier than gold.

At the other end of the scale of weights we have lithium, which is so light that it will float on water. It is queer stuff. Put a small chunk of it on the table and you will soon observe that it is gradually dissolving, for long it will disappear entirely, having been vaporized. Magnesium is nearly three times as light as we have lithium, it is considerably lighter than aluminum, which we are accustomed to regard as so remarkable for its lightness of weight.

Up To Date.

"How useless girls are today. I don't believe you know what needles are." "If I should about you are, grandma," protested the girl. "Of course I know what needles are for. They're to make the telephone plug."

The live bird can imitate the bark of a wild dog.

Winter Holiday Resort

A Delightful Trip Through The Canadian Rockies to the Pacific Coast.

Shortly after leaving Calgary the route of the Canadian Pacific Railway winds for some distance through the foothills before plunging into the fastness of the Canadian Rockies. Then for over five hundred miles a continuous panorama of bewildering magnificence is presented, which no pen can adequately describe. Wondrous cascaded peaks, startling precipices, snow-capped peaks, wild forest areas, clear and pure, and the most beautiful scenery in the world, the principal, so far as commercial extent is concerned, being in Wyoming, U.S.A., where it occurs in connection with coal deposits similar to those of Nicola Valley.

It has been found over small deposits of this clay in Alberta, the investigation of clay came across a large deposit of the finest bentonite, fine flint, and a large quantity of bentonite as the samples taken appear to be, is a soluble clay, composed of the finest imaginable atoms and absolutely free from grit. The clay, which is as hard as a rock, so that it has to be quarried, when dry, almost invariably crumbles when placed in water, into a perfectly smooth, creamy substance. It is used in the arts as a filler for finishing papers and for certain textiles, and a greatly increased demand would appear to have recently developed, partly owing to the scarcity of the article.

A visit to the coast that does not include a few days at Victoria cannot be a complete holiday. Victoria is a city of the "daisy" cities that are in most of their essential features very much alike, if it turns climatological, which is a fact, and a greatly increased demand would appear to have recently developed, partly owing to the scarcity of the article.

A trip to the Pacific Coast this winter will be fine and money well spent. The Canadian Pacific Agent will gladly furnish particulars and any information which may be required.

Large Grain Shipment.

Approximately fourteen thousand bushels of grain have been threshed in the Lethbridge district of Southern Alberta. Shipments of wheat up to the end of October have totalled in the neighborhood of nine millions and shipments of other grains have reached close to one million, three hundred thousand. Grain in store at the present time is estimated to be three million bushels.

High Hopes.

Mr. Hardtack—You seem to be growing pretty good today. "Thank you for the compliment. I'm glad you think so." Mr. Hardtack—Yes, if you keep on this way you stand a chance of being a fairly good looking old woman if you live long enough.

Pussyfooting.

"Passenger, is this thing porter?" "Porter (with a grin)—No, it's raising wages—London Talk."

Police Court News

From our own Correspondent

Michael Collins vs Francis Boswell of Winnifred Assault.

The above was a case which came out of a punishment given Earl Collins of the complainant at school by Mr. Boswell teacher on June 4th.

The case was heard before Peter LaMarsh J.P. the accused was found guilty of striking the boy with his fist and was fined the costs of the court, Mr. Boswell who was defended by Mr. Blow, Barrister of Medicine Hat appealed the case.

The appeal was heard at Medicine Hat about Nov. 1st inst. before Mr. Justice Green. The Judge dismissed the appeal and re-heard the evidence.

The accused was found guilty and fined \$2.00 and costs also the costs of the appeal.

Eliminating the poor Cow

The object of cow testing is to give the farmer accurate knowledge as to the production of milk and fat of each cow in the herd. It is readily admitted that the average cow does not produce as much milk as she is capable of giving, and many dairymen keep one or more cows that do not pay for their keep. Cow testing shows which cows are worth keeping in the herd and gives evidence against those that should be eliminated from the herd. "The progress of cow testing", bulletin 58, Dairy and Cold Storage Series by A. H. White, B.S.A., shows that many farmers rely on guess work to pick out their best cows from which to save better calves for the future herds. Frequently, these guesses are not correct, cows which have good conformation are not always the best producers in the herd. Dairy records will do away with guess work, and the farmer can safely select his best cows for breeding purposes. The bulletin, "The Progress of Cow Testing" may be secured free upon application to the Publications Branch, Department of Agriculture, Ottawa.

In addition to giving the essential objects of cow testing it outlines the details of organization, and gives some of the results obtained, which shows that many farmers have increased the production of their herds from 30 to 75 per cent. and some have doubled the herd average in a few years. Whenever cow testing has been followed for a few years, a decided increase in the average production of each cow will be found.

The Weather

BURDETT CASH STORE

The Money-Saving Store of Alberta

G. H. ROBINSON, Proprietor.

Winnifred

From our own Correspondent

Mr. H. LaMarsh left last Monday night with a shipment of cattle enroute to Olds, Alta.

Mr. John LaMarsh from Lethbridge was a visitor here for a few days at his parents home to bid them farewell on their departure to their new home

Constable Bradley was a visitor to Seven Persons, Whitla and Winnifred last Monday Nov. 15th.

Mr. G.W. Downs of Calgary, collector for the Advance Rumley Thresher Co. was a business visitor to town last week

Junkie the son of Mr. and Mrs. Bert Colthorp is reported very sick with Scarlet Fever and is subject to quarantine.

The man that does "Not Advertise" is not in real Business

Winnifred

From our own Correspondent

Mr. C. Harris was a visitor here from Lethbridge last Monday to attend a dance at Winnifred. I feel sure that there must be some other attractions to call him all the way from Lethbridge where there are always some very nice dances. I have no doubt that Miss— was very delighted to see him

Mr. and Mrs. Peter LaMarsh left last Tuesday night via Medicine Hat for Olds, Alberta, where they will make their future home; they will stay off at Medicine Hat for a few days as Mr. LaMarsh has some business to transact, and during those few days Mrs. LaMarsh will be able to take a much needed rest. Mrs. LaMarsh is not feeling at all well suffering from a very bad cold.

We certainly wish them the best of success

WESTFIELD

Mr. S.T. and F.R. Efford have just returned from Minn. where they were called by Telegram to the sick bed of their mother, who passed away on Nov. 1. All of her eight boys were with her in her last moments, and as she had repeatedly requested the eight boys acted as Pall Bearers

Mr. F.J. Efford and wife of Hillsboro, Oregon who were here on a visit for a few days with the family of S.T. and F.R. Efford returned to their home Monday

Mr. M. Colman left Monday for the West to look for work, he intends returning in the spring

Miss Annie Statena took dinner with Mrs. J.R. Shearer, last Sunday

Master Westly Efford had the misfortune to have his pony fall with him, so is laid up with a badly swollen leg

Burdett News

A Memorial Service was held last Sunday in the United Church, Burdett, in surmory of the fallen dead in France. Rev. Percy Johnson and Mr. J.R. Shearer of the Westfield School spoke most touchingly in honor of our Fallen Heroes, the music was provided by a male choir of nine men drawn from the local Boys and the public were very pleased with their efforts and everybody declares that they did exceedingly well, they were notable efforts in a most noble cause "Our Heroes in France."

Ross Strong, our leading mechanic had a severe shaking and his face badly mangled when a car overturned in the ditch by the Railroad Crossing this week we all hope for his speedy recovery

The friends of Mrs. Minty will be glad to know that she is getting on very nicely and that the new born baby is much better, after consulting Dr. Henderson

The school children will be glad to hear that Mrs. Johnston has a new stock of Reeve's Water Colors in.

Mrs. Webb arrived home last Tuesday after assisting Mrs. Minty for a few days

Mr. Ivan Webb is very busy these days hauling wheat to town

Mr. Mitchell has also been very busy hauling rye to the car at Burdett

We are glad to know that the young Colthorp children are progressing very favourably

We are sorry to hear that Mr. Bert Colthorp is an inmate at Medicine Hat Hospital and has undergone an operation

A stock of copy right novels just in, at popular prices also some new Reprints Ray and Borrow

E.M. Johnston

We are glad to know that the ladies of Grassy Lake have been kindly helping to supply Mrs. Mills and family with some clothing in their great time of need

The L. D. S. Church held services at 11 a.m. and 2 p.m. every Sunday. Everybody Welcome. Lots of good music and hearty singing. Come and join us next Sunday and take a fresh hold on life and happiness

Mr. Bertram had a run away this week but fortunately no one was hurt

If certain people do not keep their cows away from huggies and wagons on the street then cheap beef will be had in Burdett

A Grand Bazaar. Burdett

A Grand Bazaar will be held at Burdett on Saturday 27th. November by the ladies of the "Church of the Assumption."

There will be a large variety of Xmas Gifts
Voting contests, and Amusements for Old or Young, and a Five Course Chicken Dinner will be served from 2 to 8 p.m.
Admission to Bazaar 15c.
Tickets for Chicken Dinner 75c.

WESTFIELD

From our own Correspondent

Mr. Abe Brown and Mrs. Jessie Lake were married at the bride's home November 18th, at three o'clock, in the presence of their relations and a few friends. They left for Burdett at 10 o'clock but as their car broke down they stayed with Mrs. F.R. Efford

Mrs. Esther Carlson is laid up with a bad hand

Mr. J.R. Shearer took in the Convocation at Lethbridge, so the school children had a vacation

Mr. Jack Shearer has just returned from a few days visit with his parents at Redcliff
